To the CDM Executive Board

8 October 2009

Subject: Request for revision to AM0001

Dear Mr de Jonge,

In December 2007, Noe21 has submitted to the CDM Executive Board a request for revision of the baseline and monitoring methodology AM0001 for HFC-23 destruction. On 20 February 2008, Noe21 received a letter from the Secretary to the CDM Executive Board, Mr Schmidt, informing that the Chair of the Board requested to put the letter on the agenda of the Board. In March 2009, we sent another letter to you and urged you to consider our request. During a meeting of the CDM Executive Board in March 2009, you personally assured me that this matter will be considered and that a due response will be sent to Noe21. However, no response was sent to Noe21 or CDM Watch. It is now almost two years that Noe21 is awaiting a response from the Board, although it received written confirmation from the secretariat and oral information from you that the issue would be considered duly.

We are highly concerned how the CDM Executive Board is dealing with urgent and substantive requests from non-governmental organizations. We kindly request you one more time to put our request on the agenda of the forthcoming CDM Executive Board meeting. We suggest you to forward the request to the Methodological Panel for its consideration.

We would also like to inform you that we will raise this issue to Parties and to the press in Copenhagen, as we cannot see any progress in the consideration by the CDM Executive Board.

Best wishes,

Eva Filzmoser
