

Wahana Lingkungan Hidup Indonesia was established on 15th October 1980 in response to the injustice in the use and access of natural resources and basic essentials that support livelihoods. WALHI advocates for a fair and democratic social, economic and political system that guarantee basic rights to livelihoods and a healthy environment for our people

Track Record

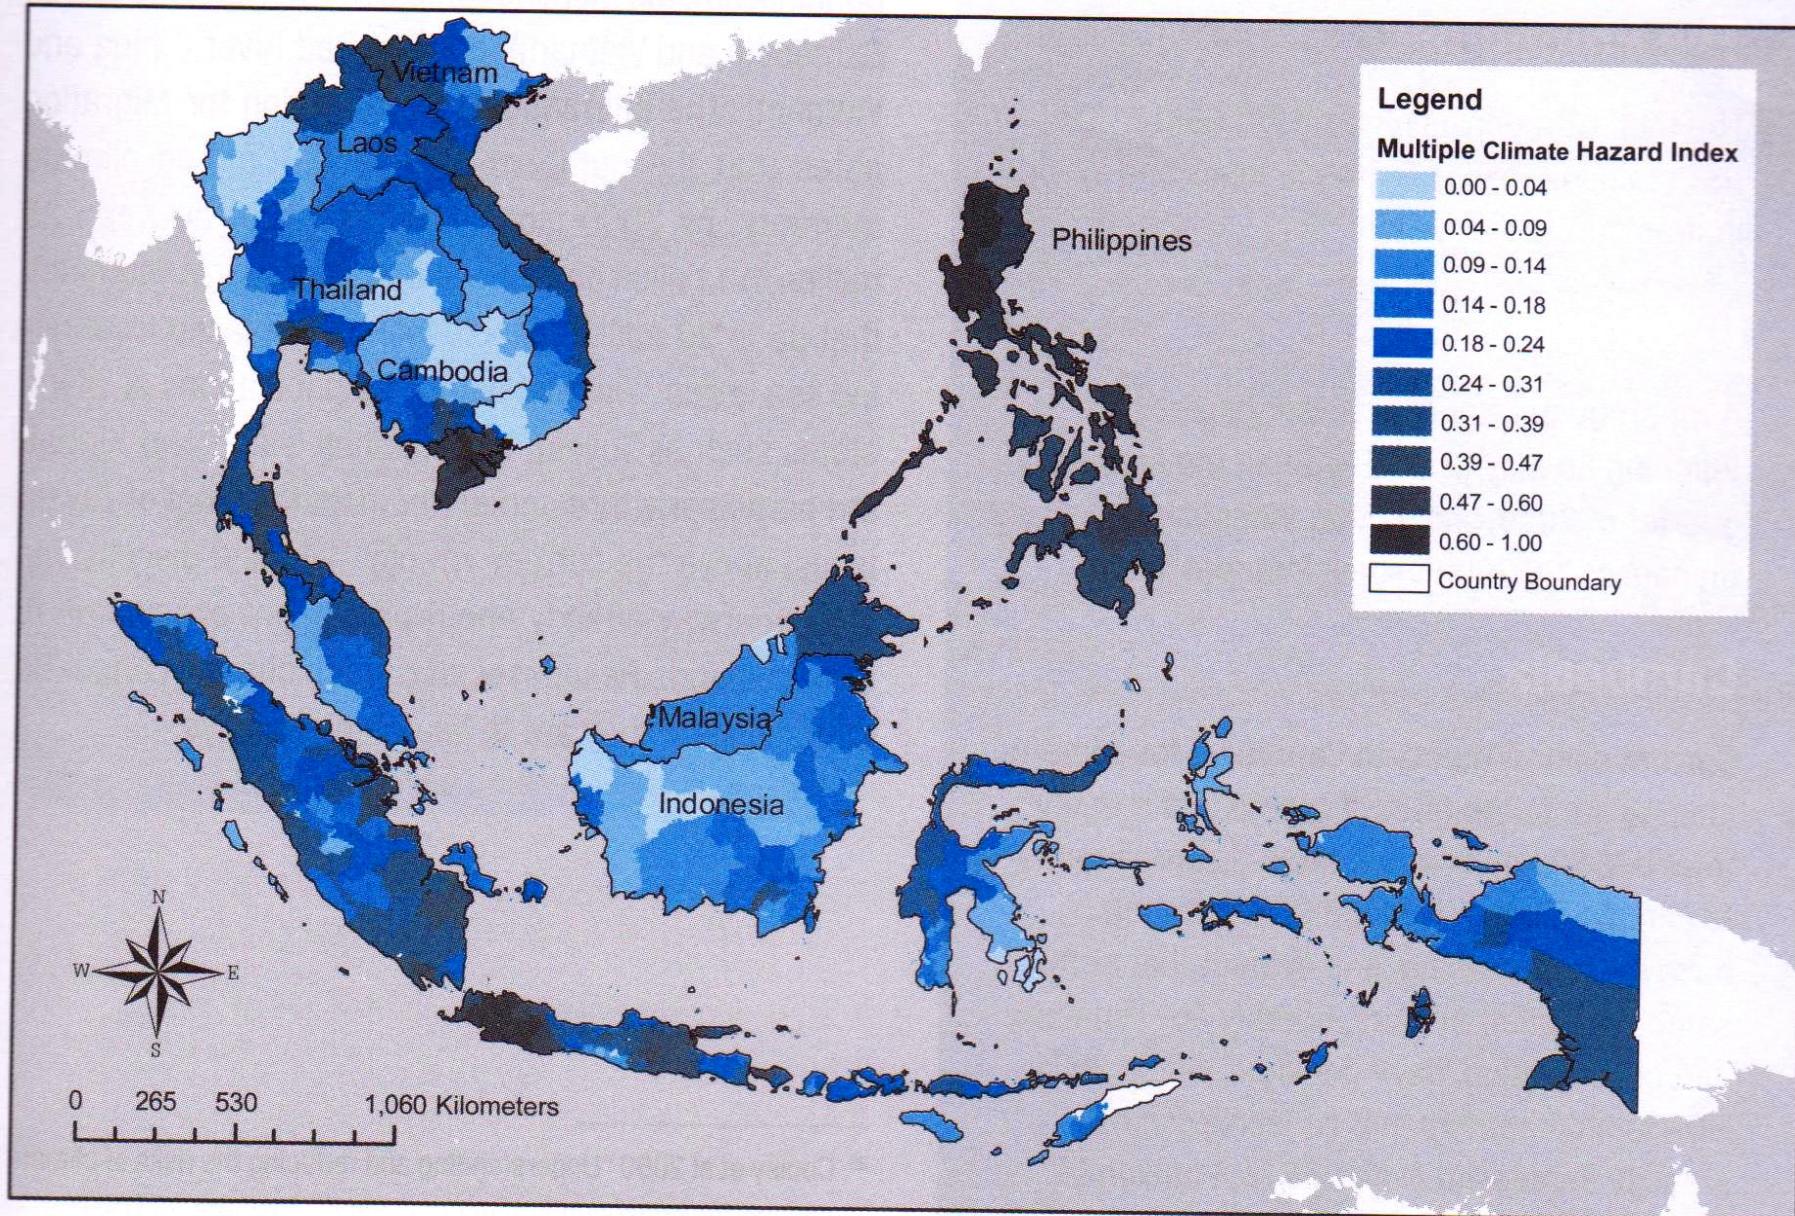

WALHI and Climate Change

- 1990 - Climate change study: Forest conservation, Ozone / CFC in Indonesia, energy(emissions and renewable energy options)
- 1991 – Studies and a series of discussions on climate change
- 1992 – Following the Earth Summit
- 1993 – Began introducing energy and climate change programmes
- 1994 – Became a member of National Commission of climate change and the only DELRI from the CSO.
- 1995 - Awareness campaigns with KLH, criticizing the government's position in relation to the CDM.
- 1999 s/d 2004 – Energy and climate change programmess ceased in the EN, functional structure (all were merged into the campaign division). Still engaged in climate change, focusing on lobbying against CDM initiatives.
- 2005 - PNLH IX mandated the energy programme.
- 2006 – Initial discussions on the reactivation of CAN Indonesia.
- 2007 – Present in SBSTA Bonn and involved with CSO in discussing the COP 13
- 2008 s/d 2011 – Actively involved in the negotiation rounds of the UNFCCC, REDD advocacy and climate finance , safety mainstreaming of women in climate change resolution.

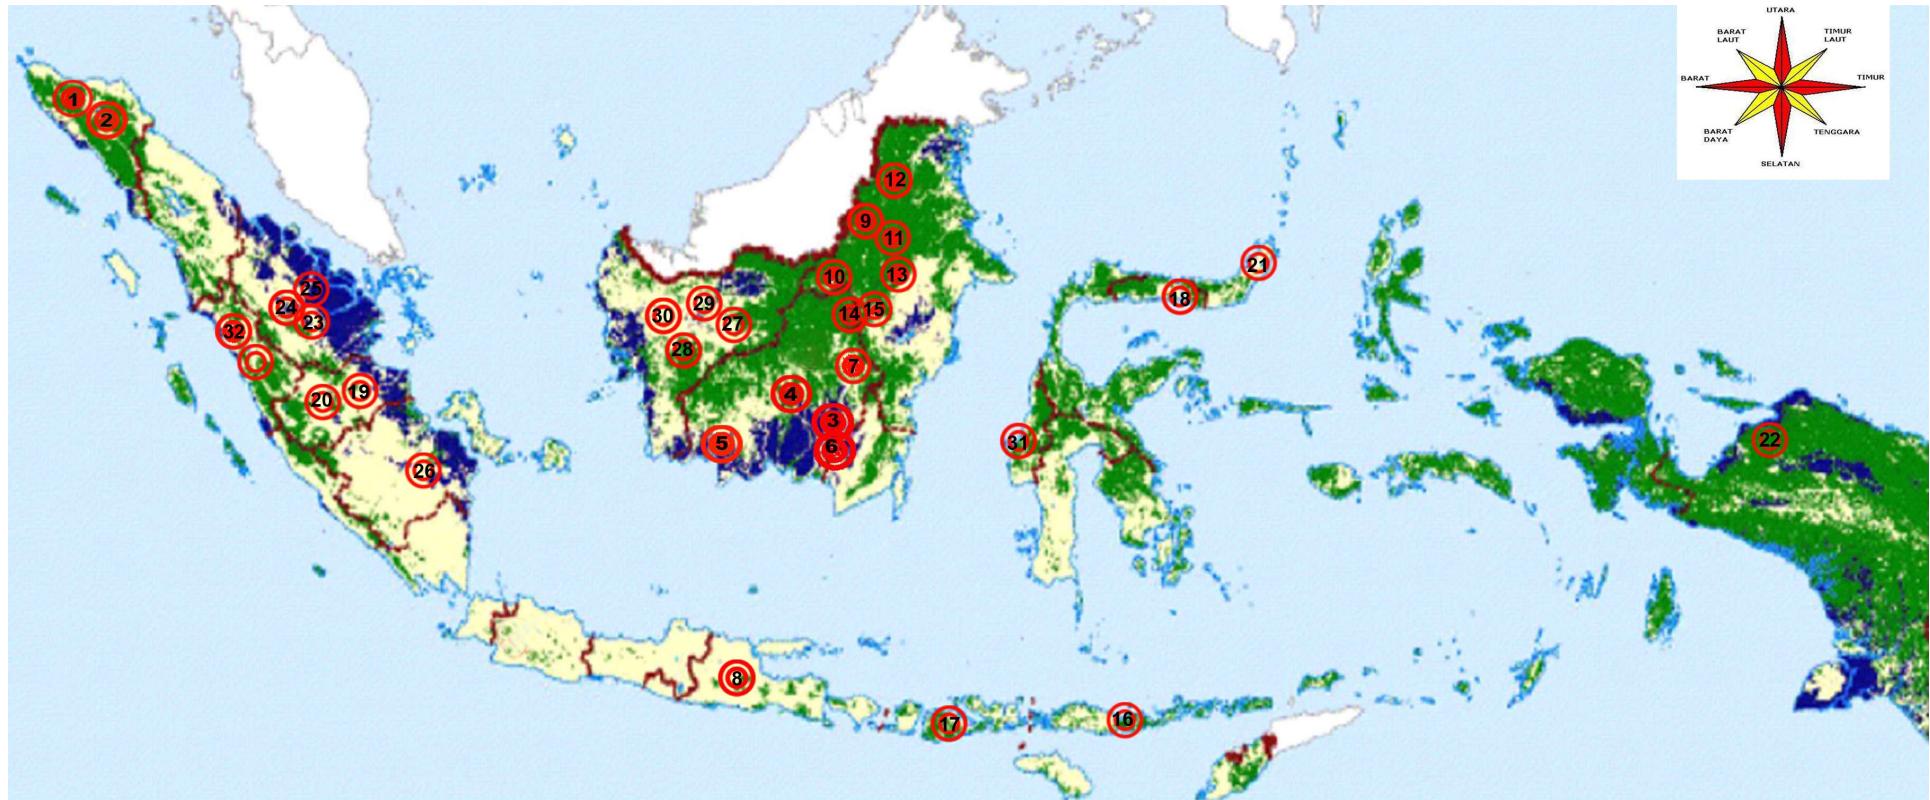

Indonesia Carbon Market Through REDD+ Initiative

Carbon Market within REDD+ Initiative in Indonesia

- Law No. 32 Year 2009 regarding Environmental Protection and Management, Article 43 Subsection 3d **“Development of Trading System of Waste and/ or Emission Disposal Permit”**
- Ministry of Forestry Regulation No. P.30/Menhut-II/2009 regarding Emission Reduction Procedure from REDD
 - Article 3, REDD can be made on logging concession, pulpwood plantation, community forestry, etc
 - Article 13, REDD implementation period is no longer than 30 years and can be extended
 - Article 14, Trade in certificates of REDD for post 2012 carbon trading associated with the implementation of emission reduction commitments of developed countries.
