Subject: Re: FW: OPEN LETTER regarding the use of banned offsets by EU Member States

Dear all,

thank you for your letter.

I would like to inform you that Estonia has considered the issue of industrial gas credits under the Effort Sharing Decision. In fact Denmark formulated a political declaration concerning its intention not to use the HFC and adipic-acid N2O credits for national compliance under the Effort Sharing Decision for the period 2013-2020. It was AOB point in last Environment Council on 14 March 2011 and some member states including Estonia supported this political declaration. Member states who undersigned declaration declare to refrain from utilizing HFC-23 and adipic-acid N2O credits for compliance under Decision 406/2009/EC.

Best regards,
Karin Radiko
