

Public Comments - Checklist

DNA letter of approval

Has your DNA approved this project?

**Public
consultation**

Were you consulted by the project developer?
Does the summary in the PDD accurately reflect what you said and does it address the concerns you had?

EIA

Was the EIA carried out according to national laws and standards?

Additionality

Will this project go ahead anyway if it is not registered as CDM project

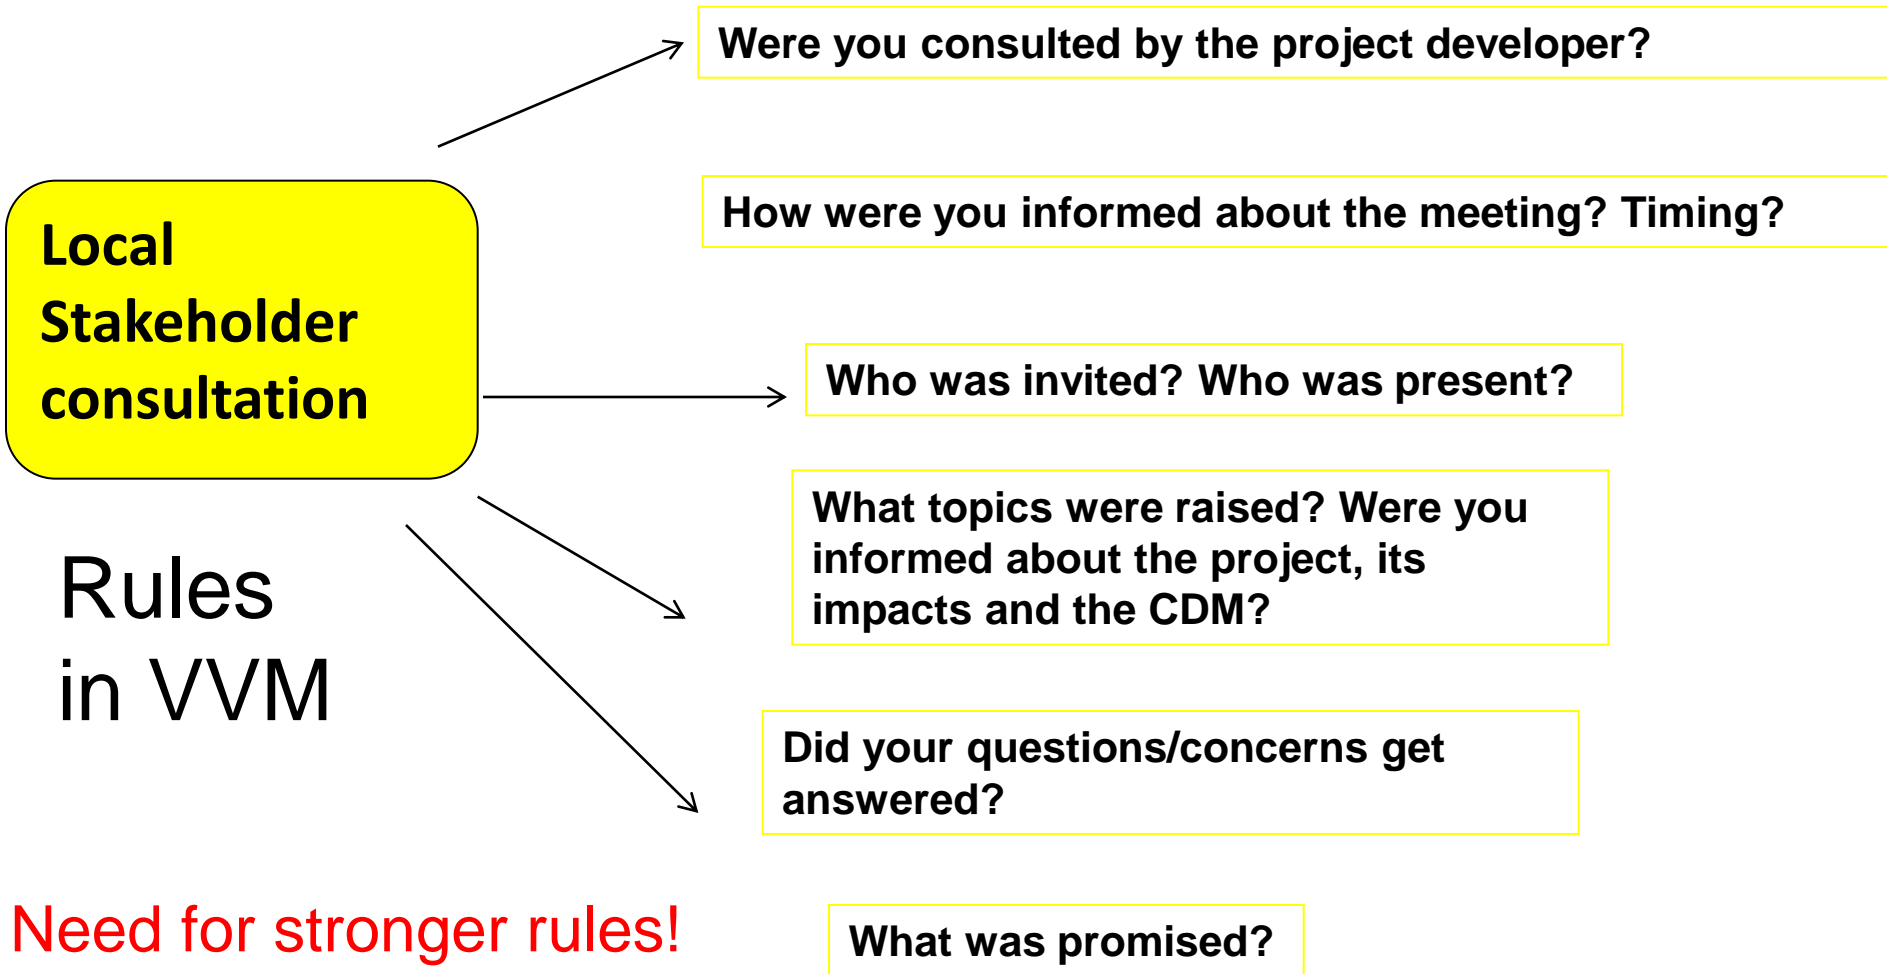

Has the project already begun? Construction works etc..?

Baseline: accurate and credible estimation of what will happen in the absence of the project being registered as a CDM project?

SD

Does the project contribute to sustainable development in your country?

Public Comments - Checklist :Local Stakeholder consultation

Public Comments - Checklist

Start of 30 day commenting period

Through alert@cdm-watch.org &
UNFCCC RSS feeds

Research & draft comment – need to focus on the violation of CDM rules
(additionality, local stakeholder consultation, etc..)

Submissions valid in English only, through online system

Deadline: 24h GMT on last day

Next steps:

Prepare for publication of validation report (~1 year)
– comments must be taken into account – project
can only be validated if DOE can prove that project
complies with rules despite your claims!

Contact project developers / Buyers / DNAs to raise issues
Inform local national and international press about issues
Monitor for CDM validation report to be published
