

ENSURING INTEGRITY OF PARIS AGREEMENT ART.6 CHALLENGES AND OPPORTUNITIES FROM A CIVIL SOCIETY PERSPECTIVE

The Paris Agreement's Article 6 opens a new era for international carbon markets, establishing multiple avenues for cooperation, including the Sustainable Development Mechanism (SDM). Carbon markets will need to function in a radically changed world, where all Parties have commitments towards a common 1.5 degree target and longer term de-carbonization goal.

At this event, experts will reflect on crucial elements to ensure robust governance and social and environmental integrity of the new mechanisms. At the occasion of the event, a new policy briefing "Building blocks for a robust Sustainable Development Mechanism" will be launched.

Thursday 11 May

Room Bonn (181), Time 16.45-18.15^{CET}

Speakers:

- Overview of Parties' views on Article 6, **WOLFGANG OBERGASSEL**, *Wuppertal Institut*
